PROFILE

As a full stack software engineer at the BBC, I bring a wealth of experience and expertise in developing complex, innovative, and user-focused web applications. With a deep understanding of both front-end and back-end web technologies, I am able to design and build scalable, robust, and high-performance software solutions that meet the needs of users and stakeholders alike.

SKILLS

- JavaScript, TypeScript & React
- Node.js, Python, SQL
- AWS, Azure & Google Cloud
- CI/CD, REST, GraphQL & Jest
- Scrum, Kanban, Jira, Trello & Asana
- Project Management Tools
- Strong Communication

EXPERIENCE

SOFTWARE ENGINEER

BBC

November 2022 - Present

- Write clean, efficient, and maintainable code that is easy to understand and modify.
- Participate in code reviews and other quality assurance activities to ensure that all software is of the highest quality.
- Communicate clearly and effectively with stakeholders, both within the engineering team and across the wider organization, to ensure that everyone is on the same page and that projects are delivered successfully.
